- Abich, H.W., Academician, 237, 250  
Abramov, M.P., 395  
Abrikosov, A.I., 469, 470  
Academy of Sciences  
  attacks on members' defense of science, 680–682  
  campaign to keep Koltsov out, 684  
  membership study (See Academy of Sciences membership study)  
Academy of Sciences membership study  
  age at election and life span, 234–237  
  birthplace and place of origin, 240–243  
  children and grandchildren, 265–270  
  conclusions and observations from the survey, 276–278  
  data collection method, 230  
  date of birth and grouping of the data, 230–233  
  departments and specialties, 233t  
  ethnic and social origin, 243–246  
  family status, 255–257  
  family trees illustrating outstanding lineages, 270–276  
  features of the intelligentsia, 279–280  
  higher education and activities prior to election, 237–240  
  limits and content of, 229–230  
  number of children of fathers and brothers and birth order, 257–260  
  occupations of fathers and brothers, 247–250  
  outstanding relatives, 250–255  
  Russian and foreign composition over 200 years, 227–229  
  spouses and their lineage, 261–265  
Acosta, Uriel, 684, 686, 687  
Adadurov, V.Ye., Academician, 228  
Agol, I.I., 534, 536, 649, 654, 678, photo insert  
Agranov, Ya.S., 57  
Agro-Joint (American Jewish Joint Agricultural Corporation), 292  
Akaky Akakievich (literary character), 437  
Aksakov family, 63, 196  
Aksakov, I.S., 263  
Aksakov, K.S., 263  
Aksakov, S.T., 263  
Aksyonov, V.V., 201, 203  
Alapovsky, I. "Muravey", 337  
Alapovsky, V., 337  
  detailed list of generations, 411–414  
  ethnicity and possible inborn traits, 410  
  father's traits and life story, 407–409  
  Friedrich Witte's descendents, 406–407  
  German heritage, 405–406, 410  
  mother's traits and life story, 409  
  talents of S.Yu. Witte, 334  
Anderson, 607  
Andreev, A.A., 469  
Andreev, F.A., 531  
Andreev, L.N., 462  
Andres, A.G., 544, 545, 582, 593, 624, 654  
Andreski, Stanislav L., 723  
Andreyevich, Ya.M., 343  
Andrusov, N.I., Academician, 244, 260, 263, 267  
Anesthetics, 428  
Anfimov, V.Ya., 308, 415  
Anna Ioannovna, 21  
Anna Yaroslavna, 313  
*Annals of Eugenics, The* (Fisher), 11, 586  
Annenkov, I.A., Decembrist, 388, 400  
Annenkov, N.N., 388  
Annenkova, V.N., 388  
Anosov, P.P., mining engineer, 251  
Anthropogenetics  
  medicine and (See "Anthropogenetics and Medicine")  
  place in a socialist state (See "Anthropogenetics and Eugenics in a Socialist Society")  
  trait inheritance and, 728–730  
  twin studies (See Twin studies)  
"Anthropogenetics and Eugenics in a Socialist Society" (Serebrovsky)  
  argument that relationships and emotions should not be a factor in reproduction, 514–515  
  conclusions from a blood type genofond analysis, 509–510  
  content of anthropogenetics, 505  
  eugenics' inability to succeed in a capitalist society, 512–513  
  formula for possible gene combinations, 505  
  geographical genetics' relevance to population analysis, 507–509  
  mutational process and, 510–511
- Alapovsky, Ye., 337  
Albinism, 116  
Albrecht, W., 561  
*Album of Confessions* (L.F. Dostoevskaya), 441–442  
Alchevskaya, Kh.D., 450  
Alcoholism and natural selection, 143  
Aleksandr Nevsky, Prince, 358  
Aleksandrov, A.D., 697  
Aleksandrova, F.I., 301  
Alekseev, Academician, 233  
Alekseev, K.S. See Stanislavsky, K.S.  
Alexander I (Romanov), 321, 328, 335, 368, 386, 394, 408  
Alexander II (Romanov), 325, 327, 409  
Alexander III (Romanov), 409  
Alexander the Great, 441, 646  
All-Union Academy of Agricultural Sciences (VASKhNIL), 530, 535, 536, 537, 646, 656, 678–680, 686, 687, 691  
All-Union Agricultural Exhibition (VSKhV), 650, 677  
All-Union Communist Party (VKPb), 647  
All-Union Institute of Plant Breeding (VIR), 207, 677  
ALS (amyotrophic lateral sclerosis), 543–544  
Altenburg, Edgar, 604, 605  
Altruism. See "Origin of Altruism, The"  
Altukhov, Yu.P., Preface  
Amenitsky, D.A., 306  
American Breeders Association, 13  
American eugenics. See Eugenics in America  
American Genetic Association, 13  
American Jewish Joint Agricultural Corporation (Agro-Joint), 292  
Ammon, Otto, 519  
Amyotrophic lateral sclerosis (ALS), 543–544  
Analytic abilities and heredity, 119–121  
Anaximander of Miletus, 703  
"Ancestors and Descendents of the Academician Karl Ernst von Baer" (Nelidov and Essen)  
  ancestors of K.E., 374–376  
  descendents of Maria Julianne, 384–386  
  detailed list of generations, 377–384  
  genealogy table narrative, 371–374  
"Ancestors of Count S.Yu. Witte" (Lyubimov)

- “Anthropogenetics and Eugenics in a Socialist Society” (Serebrovsky) (*Continued*)  
promise of eugenics, 511, 515–516  
response to comments about the article, 517–518  
scope of task involved in studying the human gene, 505–506  
socialism’s potential for changing attitudes towards selective reproduction, 515  
topographical genetics importance, 506–507  
Western eugenics’ misguided focus on selective breeding, 513
- “Anthropogenetics and Medicine” (Levit)  
birthrate and differential mortality of males and females study, 593  
bourgeois science being conducted in Germany, 588  
call to advance anthropogenetics studies, 598–599  
correlation of humans study, 593–594  
deep divide regarding study of heredity and environment, 595–596  
deficiencies and advantages to man as an object of genetic study, 589, 590  
etiology of disease helped by genetics, 591  
gender and its relation to pathology study, 592–593  
genetics and the nature of mutations, 597–598  
incompletely expressed disease study, 592  
mathematical genetics, 598  
need to raise the scientific level of anthropogenetic studies, 596–597  
nosology study, 592  
purpose of the genetics conference, 588–589  
questions that emerge only in the study of humans, 590  
role of genetics in studying intersexuality and gynandromorphism, 593  
role of genetics in studying prophylaxis and therapy, 594–595

emergence of two eugenics journals, 209–210  
focus on the science of human heredity, 210–211

- Bulletin of the Bureau of Eugenics*  
(Continued)  
perpetuating the intelligentsia (See  
"Intelligentsia and Giftedness")  
publication of, 205
- Bulletin of the Soviet Academy of Sciences*,  
680–682
- Bulwer-Lytton, Edward, novelist, 312
- Bumke, Oswald, 429, 448, 452
- Bunak, V.V., 59, 209, 469, 470, 478, 493,  
502, 503, 545, 623, 624
- Bunge, N.Kh., Academician, 240, 252,  
256
- Bunin, I.A., writer, 264, 270,
- Bunina, A.I., poetess, 264
- Bunina, M.P., poetess, 273
- Bunsen, Robert, 107
- Burdenko, N.N., 686
- Burmeister, Maria von, 383
- Buslaev, F.I., Academician, 260, 321
- Buslaev, V. (literary character), 180
- Butlerov, A.M., Academician, 134, 260,  
263
- Butsinsky, P.N., 348, 350
- Byron, George Gordon, Lord, 80, 368
- Cain (literary character), 79, 80
- Calvin, John, 108, 429
- Cancer, 486–487
- Cancer tumors as a racial characteristic,  
486–487
- Cannon, Walter, 103
- Capitalism and eugenics  
eugenics' inability to succeed in a  
capitalist society, 512–513  
state of Anglo-American genetics,  
586–587
- Carlson, E.A., 7, 645
- Carlyle, Thomas, 722
- Castle, William Ernest, 147, 560, 601,  
603, 605
- Catherine I, 319, 352, 369, 407
- Catherine II (the Great), 19, 325, 363,  
390, 394, 398, 402, 408
- Central Commission on Improvement  
of Scholars' Life (TsEKUBU),  
474, 475
- Central Executive Committee of the  
Soviet Union (TsIK SSSR), 646
- Chaadaev family, 359
- Chaadaev, P.V., Major General, 155t,  
320, 362
- Chaadaev, P.Ya., 63, 155t, 156, 201, 318,  
320, 355, 356t, 361–363, 365, 367,  
392, 394, 395
- Chaadaev, Ya.P., 155t
- Chaadaeva, M.D., See Volkonskaya,  
M.D.
- Chaadaeva, M.I., née Tolstaya, 320, 361
- Chaadaeva (Shcherbatova-Chaadaeva),  
N.M., 155t
- Chaliapin, F.I., 63, 156, 181–184
- Chaliapin, I.Ya., 181–184
- "Characterological Analysis of Families"  
(Volotskoy). See Dostoevsky fam-  
ily analysis
- Charcot-Marie amyotrophy, 616,  
636, 669
- Charlemagne, 313, 316–317
- Charles XI of Sweden, 372, 407
- Chebyshev, P.L., Academician, 233,  
250, 256
- Chekhov, A.P., 79, 129, 462
- Chemical bases of psychological features  
emotions, 99–104  
instinct, 93–99  
temperament, 89–93
- Chepurkovsky, M.M., 502
- Cherkasov, A.I., Baron, Decembrist,  
395, 398

*Imaginary Numbers in Geometry* (Florensky), 1–2  
“Impact of Culture on Selection in Humans” (Koltsov)  
  elimination of natural selection and, 139  
  estimated rate of natural selection in a modern country, 139–140  
  generational consequences of neo-Malthusian unnatural selection, 145–148  
  irony of self-extinction leading to extinction of civilizations, 148–150  
  Malthus’s advocacy of limits on childbirth, 136  
  reproductive rate decrease with economic success, 147  
  selection of the fittest in modern times and, 140–145  
  stopping the process of degradation of civilized nations, 150–151  
  utility in Darwin’s natural selection process, 137–138  
Imperial Cancer Research Fund, 487  
*Improvement and Degeneration of the Human Race* (*Usovershenstvovanie i vyrozhdnenie chelovecheskogo roda*) (Florinsky), 23  
“Improvement of the Human Race” (Koltsov)  
  advocacy of education programs, 80–81  
  beneficial nature of natural selection, 81–82  
  biological selection applied to chicken breeding, 69–70  
  blood chemical properties’ inheritance studies, 73–75  
  complexities in studying trait inheritance in humans, 72–73  
  consideration of selective endorsement of some marriages and banning of others, 78–80  
  eugenicists’ attention to phenotype, 73  
  eugenic significance of limitations on reproduction, 84–85  
  eugenic significance of revolutions, 83–84  
  eugenic significance of war, 82–83  
  eugenic’s meaning, 66  
  eugenics presented as a national good, 85–86  
  eugenics seen as a religion, 86  
  eugenics versus previous attempts to improve humanity, 66–67  
  forced sterilization laws, 79–80  
  hypothetical Martian’s process of breeding trait-specific humans, 71–72  
  ideals that could be pursued by a eugenics movement, 76–78  
  identification of a relationship between blood properties and disease resistance, 75  
  implications of Mendelian inheritance for mankind, 67  
  plant biologists’ process of selecting for desired traits, 68–69  
  preferred support of positive measures, 80  
  recognition of a frequent combination of madness and genius, 79  
  requirement of careful maintenance of desired breeds, 70  
  scientists’ obligation to be neutral, 75–76  
  sociologists’ belief in inheritance of acquired positive traits, 67  
  unlikelihood that people would give up freedom of marriage, 72
