## A

- Acacia ants, 23–24, 24f  
*Acanthodactylus boskianus*, 65  
*Acanthodactylus scutellatus*, 65  
Acetylcholine, 37  
Acquisition of behavior, 35–57  
    evolutionary history informed by, 10–13, 12f  
    overview of, 35–36  
*Acromyrmex lobicornis*, 220  
Adaptive function, 18–25  
Adaptive radiation of Galápagos finches, 4  
Adaptive significance  
    of bird songs, 3  
    as one of Tinbergen's four questions, 2f, 3  
Aggregation, neural basis of, 201–202, 202f  
Aggression  
    adult social, 215–222  
    infanticide, 235–236  
    learning and, 231–235  
    neural and hormonal mechanisms of, 227–231  
        in females, 230–231  
        in males, 227–230, 228f, 230f  
        testosterone surge after winning, 231  
    positive reinforcement of successful, 233  
    siblicide, 235, 236–238  
Akre, Karin, 137  
Alarm calls  
    evolution of, 198  
    of ground squirrels, 23, 23f  
    of vervet monkeys, 139  
Allelic variation, in genes, 18f  
Altruism, 22–24  
    cooperation and, 197–204  
    eusociality, 208–211, 209f  
    green beard gene, influence of, 204–205, 206f  
    Hamilton's rule, 199  
    kin recognition and, 204–205  
    role of faces in human, 207  
Amphibians. *See also* Frogs  
    call recognition in frogs, 30, 31f, 32, 146–149,  
        148f, 151  
    newts (*Taricha*), 76, 77f  
    sex determination in, 123  
Ancestral behaviors, estimating, 30–32, 31f  
Anglerfish, 187, 188  
*Anolis lizards*  
    conditioned place preference, 234–235, 235f  
    convergent evolution, 28  
    dewlaps, 27–30, 28f, 29f  
    ecotypes, 28  
    habituation and sensitization in, 232, 233f  
Antagonistic pleiotropy, 162  
Anthropomorphism, 138  
Ants  
    acacia, 23–24, 24f  
    dear enemy effect, 220, 221f  
    parasite-induced behavior in, 78–79, 78f  
    serotonin effects in, 229  
Aphids, color perception by, 8–10, 9f  
Appetitive behavior, 59–66  
    caching and hoarding, 62–66, 63f, 65f  
    overview of, 59–60, 60f  
    physiological drive for, 60–62  
Aquatic garter snake (*Thamnophis sirtalis*),  
    76–77, 77f  
Archetti, Marco, 8  
Arctic tern, migration of, 90–91, 90f  
Armpit effect, 206  
Arnqvist, Göran, 162
