 - population genetic models of within-locus conflict, 358
 - overview, 355–356
 - reinforcement and sexual conflict, 357, 362
 - Sperm competition
 - male adaptations to sperm competition
 - copulation extension or repeating, 331
 - copulatory plugs, 333–334
 - ejaculate variation
 - seminal fluid proteins, 333
 - sperm number, quality, and morphology, 331–333
 - mate guarding, 330–331
 - overview, 329–330
 - strategic allocation of mating effort, 334
 - sexual cascade, 5, 10–11
 - sexual conflict
 - costs and benefits
 - females, 335
 - males, 334–335
 - mitigation and benefits, 335–336
 - Sperm release. *See* Female-targeted sperm release
 - Spiroplasma ixodetis*, 314
 - Spiroplasma poulsoni*, 314
 - SPR. *See* Sex peptide receptor
 - SR, 165, 169–173
 - Sry*, 167
 - Symbiosis. *See* Mother's Curse; Reproductive parasitism
- ## T
- Teleogryllus commudus*, 106
 - Telostylinus angusticollis*, 102
 - Tenrec caudatus*, 389
 - Thamnophis sirtalis*, 29–32, 388
 - TI. *See* Traumatic insemination
 - Tidarren*, 374
 - Tmy*, 174
 - Traumatic insemination (TI). *See also* Copulatory wounding
 - Drosophila*, 118–119
 - selection from accidental sperm and seminal fluids, 126
 - sexually antagonistic trait, 93–95
 - Traumatic mating. *See* Copulatory wounding
 - Tribolium castaneum*, 55, 186
 - Trichogramma*, 313
- ## U
- Unity sex ratio, evolution, 10
- ## V
- VERL, 62–63
 - Vertically transmitted symbiont.
See Mother's Curse

Index

W

W chromosome. *See* Sex chromosomes
Wolbachia, 161, 311–314, 316–318, 320, 321–322

X

X chromosome. *See* Sex chromosome drive; Sex chromosomes
Xenopus, 184
Xiphophorus maculatus, 295
X-linked genes, parental antagonism, 43–44

Y

Y chromosome. *See* Sex chromosome drive; Sex chromosomes
Y-linked genes, 43

Z

Z chromosome. *See* Sex chromosomes
Zyginidia pullula, 312
Zygotic drive. *See* Sexually antagonistic zygotic drive
